SKILLS

- PHP with Laravel Framework.
- Vue js, React.js, Inertia js, Livewire, Bootstrap, Tailwind CSS.
- SQL, MySQL, PostgreSQL.
- cPanel, VPS Server, Linux OS, macOS.
- Git, GitHub, GitLab, CI/CD.
- Docker, Microservices.
- S3 Storage, integration with third-party packages, and the ability to develop custom packages.

RAYHAN ALI

Full-stack Developer

WORK EXPERIENCE

SOFTWARE ENGINEER — Apr, 2026 – Present

Dream71 Bangladesh Ltd, Basundhara R/A, Dhaka

DRIP — Government Project

React.js | Laravel | PostgreSQL | GIS | Microservices Architecture

- Leading frontend development for a government disaster and climate risk information platform (**DRIP**), covering public-facing and administrative applications.
- Architecting responsive React.js interfaces, coordinating frontend implementation, integrating APIs, developing reusable UI components, and implementing test cases to ensure UI functionality and reliability.
- Integrating Laravel REST APIs and implementing OAuth 2.0 Authorization Code Flow with PKCE for secure cross-application authentication.
- Working within a microservices-based architecture to support modular application development, service integration, and scalable system workflows.
- Developing GIS-based risk assessment interfaces for Hazard, Exposure, Vulnerability, and Risk, supporting spatial data visualization and analysis.
- Collaborating on administrative workflows, role-based access control, and data management features.
- Contributed to a project whose full codebase underwent testing and received approval from the Bangladesh Computer Council (BCC).

Project: http://drip.gpad.com.bd

SOFTWARE ENGINEER — July, 2025 – Mar, 2026

OnestTech, Banani, Dhaka

Trusted HRM (CodeCanyon Approved)

Laravel | Blade | REST API

- Contributed to the development of a commercial Human Resource Management (HRM) system built with Laravel, supporting workforce management and business operations.
- Developed and optimized core modules, including Payroll, Attendance, Employee 360° Performance, Project Management, and Employee Directory.
- Developed RESTful APIs to support mobile application integration and implemented features such as multi-language support, Discord integration, support tickets, and live chat.
- Worked on backend business logic, database backup functionality, and system integration to improve application reliability and maintainability.
- Contributed to production deployment and backend optimization to support scalable HR management workflows.

Project: https://demo.trustedhrm.com

SOFT SKILLS

- Team Collaboration & Coordination
- Technical Problem-Solving
- Analytical Thinking & Problem-Solving
- Adaptability & Self-Motivation
- Time Management & Deadline Management
- Requirements Analysis & Client Communication

EDUCATION

B.SC IN CSE
European University of Bangladesh
2025 - Present

DIPLOMA IN CSE
Bangladesh Polytechnic Institute
2018 - 2022

CERTIFICATIONS

BASIS-SEIP (BITM)
PHP with Laravel Framework
Sep 2022 - Dec 2022

OSTAD LIMITED
Full Stack Web Development
Nov 2024 - Apr 2025

BOHUBRIHI
PHP with Laravel Framework
Jan 2021 - Mar 2021

AI-Powered News Script Platforms (CodeCanyon Approved)
Laravel | REST API | AI Integration

- Led project development, backend architecture, and module implementation for an AI-powered news publishing and content management platform designed to streamline newsroom operations and multi-platform news distribution.
- Developed AI-powered language-wise translation features to support multilingual news publishing and content management.
- Implemented key modules, including News Archive, E-Paper Management, Instagram News Feed Integration, Automated News Scraper, Media Gallery, and Advertisement Management.
- Developed and integrated RESTful APIs, automated content workflows, and AI-driven features to improve publishing efficiency and system functionality.
- Optimized backend logic, database operations, and application architecture to support maintainability, scalability, and reliable production deployment.

Project: https://news.onesttech.com

LandLord (CodeCanyon Approved)
Laravel | Blade |Payment Gateway Integration

- Developed property management modules for tenant, lease, rental, sales, and financial operations.
- Implemented AI-powered natural-language property search, payment gateway integrations, automated invoicing, and agreement generation.
- Built backend workflows for payment processing, billing reminders, and modular feature management.

Project: https://landlord.onesttech.com

JR.LARAVEL DEVELOPER
Mar, 2023 – Feb, 2025

Seopage1, Adabor, Dhaka

ERP System (In-House Product)
Laravel | React.js | REST API

- Developed Laravel RESTful APIs and backend business logic to support React.js frontend integration.
- Built dynamic user interfaces using Laravel Blade templates and AJAX for asynchronous data loading and form submissions.
- Implemented core modules for PM Goal Management, Employee Evaluation, Daily Submission Tracking, and Attendance.
- Collaborated on module development, database operations, and application deployment through cPanel.

P**roject:** https://github.com/mdrayhanseopage1

BACKEND DEVELOPER
Oct, 2023 – Apr, 2024

DR. Myatt Academy, Canada (Remote)

LMS System
Laravel | React.js | REST API

- Developed backend functionality and RESTful APIs for student and teacher learning platforms.
- Implemented course purchasing, payment processing, MCQ examinations, and PDF drawing features.
- Improved backend workflows and supported seamless integration with the React.js frontend.
